

FAUZAN GAUHAR KHAN

.NET Developer | C# · ASP.NET Core · Blazor · SQL | Unity Game Developer

Abbottabad, Pakistan | 0329-5645366 | fauzanguhar037@gmail.com | github.com/fauzan-gk | linkedin.com/in/fauzan-gauhar-khan-b1226a316

SUMMARY

.NET developer and BS Computer Science student with hands-on experience across the C# ecosystem — C#, ASP.NET Core, Blazor, Web APIs, and SQL Server/EF Core. Built and shipped CyberShield, a full desktop antivirus application with a multi-layer scanning engine, placing runner-up in a Semester Project Competition. Also shipped full-stack mobile products (Firebase/Supabase) and Unity/C# systems, showing strong OOP fundamentals and a track record of delivering complete, working software under tight timelines.

EXPERIENCE

Freelance .NET / C# Developer | Self-employed (Fiverr & Upwork) Dec 2025 – Present

- Deliver custom C#/.NET solutions and Unity systems for freelance clients, from scoping through implementation and handoff.
- Manage full project lifecycle independently — requirements gathering, development, testing, and client communication.

Game Developer Intern | EliteTech Jan 2026 – Mar 2026

- Completed a 6-week internship contributing to live Unity projects: implemented gameplay systems, prototyped mechanics, and optimized runtime performance.

PROJECTS

CyberShield — Antivirus Desktop Application (C#, .NET, WinForms) Oct 2025 – Dec 2025

- Built a fully functioning antivirus application in C#/.NET with a 3-layer scanning engine (quick scan, deep scan, heuristic layer) and real-time background protection.
- Designed the scanning pipeline and utility toolset end-to-end; placed runner-up in a Semester Project Competition against peer teams.

GearShare — Peer-to-Peer Equipment Rental Marketplace (Flutter, Firebase, Supabase) 2026

- Built a full-stack mobile marketplace with Firebase Auth and automated OCR-based CNIC identity verification via Google ML Kit.
- Implemented a dual-database architecture (Cloud Firestore for real-time rental/status streams, Supabase Storage for media) with FCM + Cloud Functions push notifications and trust & safety logic (deposits, insurance, verified “Previous Renter” badges).

Driveon — Mobile Driving Game (3 Maps: Stunts, City, Drifting) 2026

- Developed a mobile driving game spanning three distinct modes — stunt courses, open city driving, and a dedicated drift map — each with tuned vehicle handling.

Sovereign of the Shattered Veil — Action RPG (Unity 6, URP, C#) Jan 1 – Jan 7, 2026

- Architected a third-person action RPG's core systems from scratch: combo-based melee combat, a data-driven quest system built on ScriptableObjects, modular inventory, and XP/skill-tree progression.
- Shipped a complete, playable build in a one-week development cycle — demonstrating rapid, disciplined delivery under deadline.

TECHNICAL SKILLS

Languages: C#, Java

.NET Ecosystem: ASP.NET Core, Blazor, Web APIs, .NET (WinForms)

Data: SQL, Entity Framework Core

Mobile & Game Dev: Flutter, Unity Engine, Unity 6 URP, OOP, ScriptableObject Architecture

Backend & Cloud: Firebase (Auth, Firestore, Cloud Functions, FCM), Supabase

Tools & Practice: Git, Debugging & Performance Optimization, Agile/Team Collaboration

EDUCATION

BS Computer Science: COMSATS University Islamabad, Abbottabad Campus

Sep 2023 – Sep 2027
